

Bilal ARKAN

Full Stack Web Developer

I am a Full-Stack Web Developer with comprehensive expertise spanning backend to frontend, system architecture, and product management.

Having spent significant time developing robust web applications, my core strength lies in the MERN and PERN stacks. I've effectively incorporated AI solutions via AWS, ensuring applications are not just functional but also intelligent. With NestJS, I've built and managed intricate SQL and NoSQL databases, ensuring data integrity and system performance. Beyond mere development, I have a deep understanding of system architecture, crafting scalable and sustainable solutions.

My approach to frontend is grounded in a mobile-first design, employing tools like NextJS, SSR, and TailwindCSS for optimum user experience. As I craft these user interfaces, I also wear the hat of a product manager, ensuring that every feature aligns with user needs and business objectives, while seamlessly integrating with the backend systems.

English

German

Experience

2023 - On Going

TheaTech

Full Stack Web Developer

- Developed multiple large-scale applications and microservices utilizing the strengths of the MERN and PERN stacks.
- Integrated AI functionalities through AWS, elevating application capability and enhancing user interactions.
- Employed NestJS for building stable and efficient applications, leveraging both SQL and NoSQL databases to ensure data consistency and system reliability.
- Designed and maintained frontends using NextJS and SSR, always with a mobile-first approach, ensuring top-tier usability and quality.
- Collaborated within scrum teams, translating user stories into tangible features while staying true to Agile principles.

2022 - 2023

Gamelab Istanbul

Web Developer

- Developed company web pages using PHP, WordPress, and Joomla.
- Created presentations and HTML Mail Templates for marketing and business communication.
- Prioritized superior performance, security, and documentation standards.

2020 - 2022

Education & Bootcamps & Freelancing & Tutoring

Web Developer

- Getting Formal and bootcamps education regarding Computer Science and Web Development
- Done various project and tutoring to beginners to get necessary skills
- Done small scale freelancing jobs regarding web development, UI Design, Wordpress etc.
